**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 5-15, 22-26 and 37 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. There is no description in the originally filed application of the containers being closed.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Chilcoat et al. (US 5,620,250). Regarding claim 34, Chilcoat ('250) discloses a process fluid distribution system comprising a plurality of process fluid distribution lines (86) having outlets (88); and a rotary coupling (including 90) in fluid communication with said plurality of distribution lines to direct process fluid to the distribution system lines, said rotary coupling comprising portions (including 160) defining a fluid receiving annulus in flow communication with an inlet (60), said fluid receiving annulus in fluid flow communication with the plurality of distribution lines (see Fig. 2), said rotary coupling including a seal arrangement (66, 142) disposed between said inlet and said annulus.

Regarding claim 35, the rotary coupling is capable of being located with a shell structure (see Fig. 1).

***Allowable Subject Matter***

5. Claims 16-21, 27, 28 and 30-33 are allowed.

***Response to Arguments***

6. Applicant's arguments are moot in view of the new grounds of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
